Since the release of AutoCAD 2004, all users of the platform can create their own extensions using a combination of Visual LISP, AutoLISP, C++, Java and Visual Basic. The application is translated to ObjectARX, which is an interface which allows other programs to access this functionality. Interoperability AutoCAD has a library of functions that enables it to read and write the following file types: DWG (2D), DGN (3D), DXF (2D,3D), SLD (2D), PPM (2D, 3D) AutoCAD read the following file types: PLY (Binary), PLY(CSV), PLY(CSV TAB), PLY (Unicode), PLY(Text), PLY (HTML), PLY(XML), FXL, SWF, and OBJ. AutoCAD has a platform, ACDstart, which allows it to be remotely accessed from any web browser. It has the same capabilities as the local application and allows direct interaction with the workbook through the program's methods and functions. The Interop Download Center To make it easier for users to find the source code for the functions and types they require, Autodesk has created the Interop Download Center (IDC). The IDC is a web-based service designed for web application developers, allowing the easy discovery and download of pre-packaged C++ and Java code, and .NET and Managed C++ assemblies. Autodesk provides pre-packaged assemblies for most of the major AutoCAD products. The Autodesk IDC is the central place where all such assemblies are located and made available for download. CRAIGS MULLINS HAWKEYE ARE COMING TO YOUR HOME CRAIGS MULLINS HAWKEYE ARE COMING TO YOUR HOME Christmas is coming and there is something that will keep every household of the Hawkeye State at ease, when they hear the lights going on. The Craigs Mullins Hawkeye has arrived. Mr. Mullins is a very popular cartoon character that came out of Fort Worth, Texas. Craigs Mullins was created in 1946 by local entrepreneur Robert Scott. Inspired by the cartoon character, he created a toy that was a children's favorite. For almost 60 years, the Heuer was the spokesman for the Mullins' Toy Company, a toy manufacturer. In 1976, Mullins retired from the toy industry. Over the years, the Heuer toy was introduced to more than 100 countries in all corners of the world. But, after the toy was discontinued, there were no more toy spokesmen for the Mullins. On October 19th, 2016, out of the blue, the Mullins' Toy Company brought Craigs Mullins back to life. On August 1st, 2016, the official mascot for the Mullins' Toy Company was launched. It was then that Mr. Mullins decided to return to his roots and make his home in the Hawkeye State. At this time, Craigs Mullins is the official mascot of the Mullins' Toy Company, the official sponsor of the Mullins' Memorial Foundation, the official mascot of the Mullins' Bullfrogs, and the Official Grand Marshal of the Mullins' Arts Festival. Craigs Mullins is being used to promote toys and games for all occasions. He is also being used to promote positive values like education and public service.
