Improvement of usability of pew-pewing

Right after the merge, our development team developed an anti-bot system that checks if the client is a machine or a human. The anti-bot system will not require clients to input a password or captcha. However, the anti-bot system can occur unexpected behaviors during research and change it within a variety of circumstances. Thus, we have

developed additional measures to prevent incorrect bot detection.

A player who completes the objective The Pure Witch's Tears will be rewarded with a random skill.

A player who completes the objective The Alluring Glory Demon will be rewarded with a random skill.

A quest that utilized the System will receive a decrease in the amount of energy consumption.

A revision was made to the "Niko's Flower" quest. The quest now will terminate if the quest boss was successfully killed by the client.
